

PIDAATUH SDN BHD

CORPORATE PROFILE

**MECHANICAL ENGINEERING &
CONSTRUCTION WORKS**

OIL & GAS | POWER GENERATION | PETROCHEMICAL | RENEWABLE ENERGY | LNG | GENERAL INDUSTRIES

CORPORATE OVERVIEW

Pidaatuh Sdn Bhd is a locally registered company in the State of Sarawak with 70% local equity helmed by Sarawakian Directors.

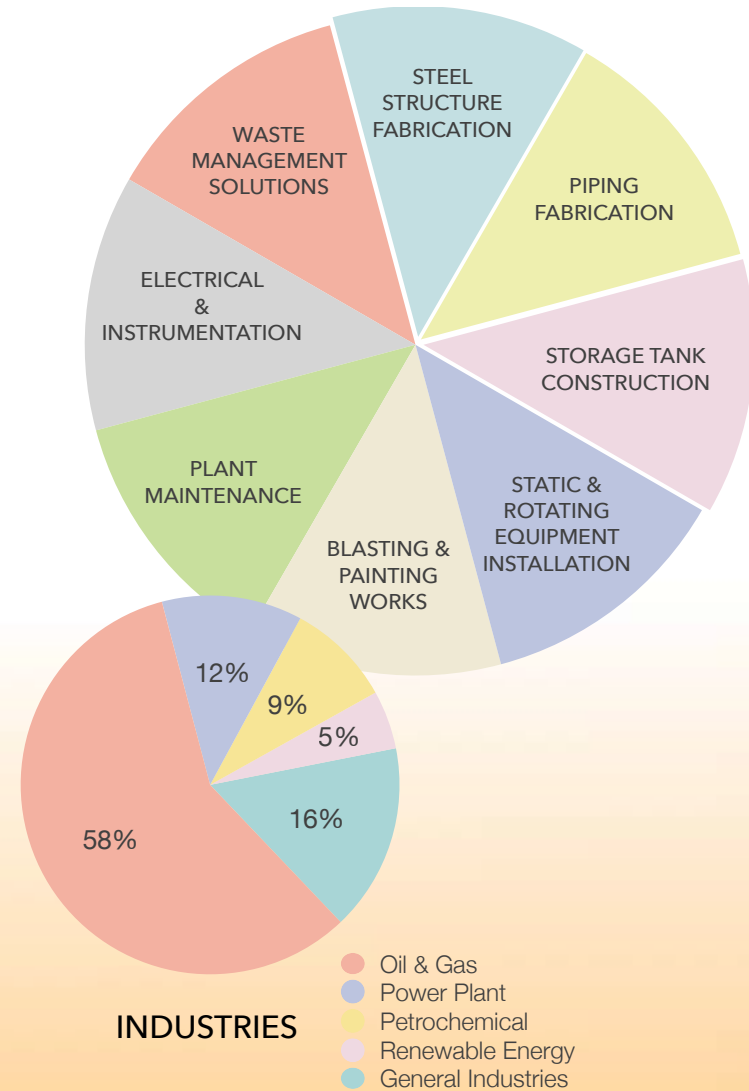

We specialise in providing engineering, procurement, construction and commissioning services for the Oil & Gas, Renewable Energy, PetroChemical, Power Generation and LNG sectors in Sarawak.

Pidatuuh takes great pride in being fully compliant with all local Sarawak regulations and adheres to the State guidelines to actively participate in projects and conduct business in East Malaysia. Our commitment to compliance ensures that we operate ethically and transparently, while also contributing to the sustainable development of the region.

Our Executive Management team have a remarkable track record of operating in Sarawak for over 13 years, providing unwavering support to international clients, including Petronas and Shell. Their extensive experience and successful collaborations have solidified our reputation as a trusted partner in the industry.

CORE COMPETENCIES

CORE COMPETENCIES & SPECIALISATION

At the forefront of cutting-edge project execution and completion, our highly skilled workforce brings exceptional trade skills and global experience. Their expertise has positioned us as a leader in delivering projects with excellence and innovation.

We specialise in the following disciplines:

- * Steel Structure Fabrication & Erection Works
- * Process Components Fabrication
- * Storage Tank Construction
- * Piping Fabrication & Installation Works
- * Static & Rotating Equipment Installation
- * Blasting & Painting
- * Pre-Commissioning & Commissioning
- * Electrical & Instrumentation
- * Plant Maintenance Services
- * Environmental & Waste Treatment solutions

With our integrated capabilities and profound technical understanding, we deliver project execution and completion in a highly cost-effective manner.

STORAGE TANK ERECTION

Design, fabrication and erection of various size tanks according to the exacting specifications and standards set by our clients.

STEEL STRUCTURE FABRICATION & ERECTION WORKS

Design, fabrication and erection of structure steel works for power plants, refineries, pharmaceutical plants and other industrial projects. We fabricate and install RCC and steel structure work based on domestic and international standards.

STATIC & ROTATING EQUIPMENT INSTALLATION

We handle pressure vessels, columns, reactors, heat exchangers, air coolers, spheres and storage tanks in accordance with internationally applied codes and standards. Additionally, we carry out works on compressors, pumps and packages (desalination units, Nitrogen, cooling towers, DM Plants, flare systems etc.)

PIPING FABRICATION & INSTALLATION

Our team have gained vast experience, skills and expertise in pipe fabrication and installation works to fulfill client requirements by applying highly innovative engineering techniques and solutions during the fabrication process and installation

BLASTING & PAINTING

Various types of blasting and painting services for the Oil and Gas Industry, including UHP (ultra high pressure), hydro blasting and the more traditional grit and steel ball blasting.

ELECTRICAL & INSTRUMENTATION

Fully integrated electrical, control and instrumentation installation services throughout the lifespan of the entire project from design to build, installation and maintenance.

PLANT MAINTENANCE

Specialist in plant turnaround, de-bottlenecking, upgrading services and a turnkey systems provider and recognised for our commitment and dedication, excellence on deliverables and attention to detail.

ENVIRONMENTAL SUSTAINABILITY SOLUTIONS

Together with our global environmental consultants and green technology partners, we provide a comprehensive range of solutions tailored to the specific needs of our clients for the treatment of industrial waste, carbon footprint reduction, emissions control and responsible repurpose, reuse or disposal of treated waste with the least practicable impact on the environment.

STRATEGIC ALLIANCES

To offer the best customer experience, we align with industry leaders to bring to market key technologies that complement the construction, operations and long term maintenance of the plants we build for our clients.

FACILITIES

Our fabrication yard in Sarawak is strategically located within easy access to the Bintulu port and is supported by offices in Bintulu and Kuching.

With state-of-the-art fabrication and welding facilities, our team of welders, assemblers, technicians and engineers hold the highest levels of certification required for every scope of work. From simple steel to exotic alloys and custom projects, no challenge is too complex for our team.

All our work is done exclusively in-house through our own hand picked and certified manpower. The yard is capable of the following output capacities :

Workshop Size	15,912 Sq. Metres (3.93 Acres)	
Description	Output Capacity	
Steel Structure	150 - 500 MT Per Month (Light, Medium & Heavy Weight)	
Blasting	120 - 150 M ² Per Day	
Painting	80 -100 M ² Per Day	
Piping	Small Bore	20K - 22K Dia. Inch/Month
	Large Bore	24K - 26K Dia. Inch/Month

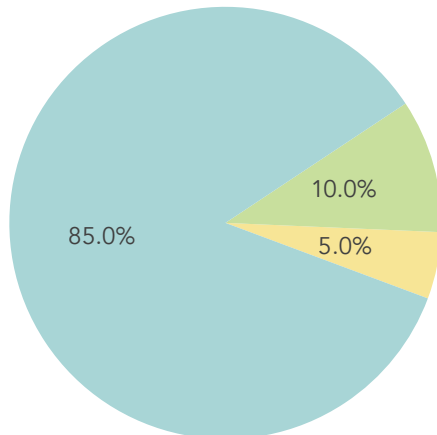

OUR TEAM

Our workforce are dedicated professionals who bring both local and international experience to each project we undertake.

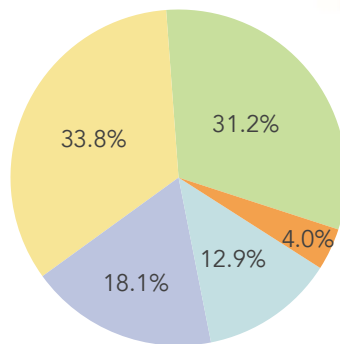

We ensure all our workmen have up-to-date government permits and we manage and deploy their expertise and skills through our Project Management Team (PMT) who oversee and ensure each project runs smoothly and according to the timelines set forth according to completion milestones.

DEMOGRAPHICS

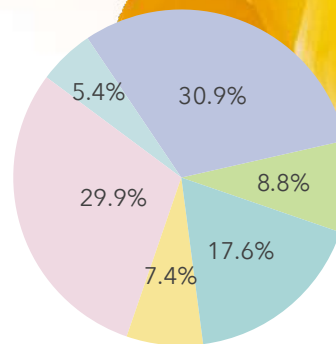

- Sarawakian
- Malaysian
- Others

SKILLED WORKMEN

- Scaffolders
- Riggers
- Welders
- Fitters
- Other trades & supporting staff

MANAGEMENT & SUPERVISORY

- Supervisors
- Quality Control Personnel
- Foreman
- Project, Construction & Site Managers
- Engineers
- Safety Personnel

INTERNATIONAL CERTIFICATION

At Pidaatuh, we are unwavering in our commitment to upholding the highest levels of accountability and compliance in all our interactions with clients, suppliers, and partners.

These principles ensure transparency, ethical practices, and trustworthiness in every aspect of our business. Our dedication to maintaining these standards is paramount to building strong and sustainable relationships with all stakeholders involved.

We are certified for the following :

- * **ISO 9001:2015** Quality Management System;
- * **ISO 14001:2015** Environmental Management System;
- * **ISO 45001:2018** Occupational Health & Safety Management System;

The robust management systems we have in place lend credibility to our competence, enabling us to confidently participate in pre-qualification questionnaires, qualify for contracts, and competitively bid for tenders.

We are top tier G7 certified by the **Construction Industry Development Board (CIDB)** in Malaysia that allows contractors or construction-related businesses to operate legally within the construction industry.

Our commitment to maintaining these high standards ensures that we are well-positioned to deliver exceptional results and uphold our reputation as a reliable and trustworthy partner in the industry.
